

How in the world is XM Instant Traffic & Weather infringing on broadcasters? I drive all over the country, and I have yet to hear a station that broadcasts nothing but traffic and weather 24 hours a day. XM is providing an absolute invaluable service to those of us who drive for a living. I am paying for this service, so I feel I am entitled to more information than is available on local broadcast channels. I don't know from city to city what local stations provide traffic and weather, or when that information is available. I believe the B in the NAB stands for BROADCASTERS, not satellite service, therefore they have no right to dictate what can be provided on a pay service. I respectfully urge the FCC to reject the NAB's petition 04-160.
